### TITLE

Electronic database of contractors

### ARTICLE

A database of information on contractors has been developed for use across the Tarmac Central region. The data is held on a central •SQL Server•, which is straightforward to use, cost-effective and allows easy accessibility via an Internet Explorer front end.

Information is provided for both employees and contracting companies. It includes:

- L names and contact details
- L contractor competencies and external certification
- L company authorised activities and sites
- L details of in-house inductions and training.

Anyone with a password can access the information and use the search facility to locate an appropriate contractor for a given situation. The data is regularly updated by authorised individuals.
