TITLE

Easy tautliner loading

ARTICLE

Entry 21005 **Finalist** **Fatal 2,3 and 5**

Aggregate Industries Concrete Products Division based in Callow, wanted to improve the loading of trailers. Loading curtain-sided vehicles, involved a time-consuming process of placing loads onto pallets and then loading by a conventional forklift.

Al worked with a specialist attachment manufacturer to create a bespoke forklift truck attachment solution, the BlockMaster TK45-TEL. This innovative attachment has enabled block packs to be loaded without pallets onto the more readily available curtain sided vehicles.
