TITLE

HSEQ new HUB

ARTICLE

In large organisations it can be a challenge to find the information or resource you need; the organisation may have the information but it is not always easy for the end user to access it.

The SHE team at Breedon recognised from the feedback provided by their internal customers located at company sites, that it needed to make it easier for managers to perform some of their tasks.

This feedback was combined with the SHE team's knowledge of what they were consistently failing to find out on-site, clarifying which communications were failing to get through to the sites.

Based on this analysis they developed a system that was easy to use and where the following could be easily accessed or achieved via one central page.

Please see [additional pdf](#) to find out more about the new system.
