TITLE
Site safety and security - Leighton Buzzard Factory
ARTICLE
Topic 4 - Highly Commended Recently at Leighton Buzzard as part of an ongoing project to eliminate the risks on site, we have expanded the delivery area and introduced one-way system. • Previously during busy periods we have queues of heavy goods vehicles backed up to the roundabout on the main highway. • These trucks cause obstruction to local businesses and we have received several complaints. • This also caused problems for pedestrian access to various businesses along the road. Please see the **additional pdf** for more information
