

The Safety and Health Vision for the UK Quarry Industry

Steady progress across all companies on the journey to Zero Harm, based upon.....

-visible commitment by senior managers
frequently demonstrated in word and deed
- the involvement of all employees
identifying and controlling risks to all
-excellent communications in all directions
from purchase and design through to product dispatch
-competence of managers, workforce, contractors
requirements understood and delivered in performance
-processes effectively driving continuous improvement
embedded into established ways of doing business
-excellent occupational health management
meeting the highest world class standards

As part of the realisation of this vision, everyone across the industry will work to standards matching the recommendations of the Target Zero working parties that report to the Quarries National Joint Advisory Committee.

This Vision Statement has been endorsed by the QNJAC on behalf of the UK quarrying industry as part of reviewing and renewing commitment to Target Zero.
