TITLE

Bagged Cement Delivery: Customer Site Safety

ARTICLE

Following an initial review of hazards and accidents associated with the delivery of bulk and bagged products, the Cement Companies in membership of the BCA have identified a number of important safety issues which they believe it is reasonably practicable for all customers to control. Consequently, a scheme has been introduced to rate how effectively these issues are being addressed by individual customer sites. This document concentrates on a narrow set of health and safety criteria specific to bagged cement delivery that should be considered as part of a customers overall risk assessment.
