• Ensure that boundary and hazard warning signage is in place and adequate.
• Review security arrangements at closed sites and determine if they are sufficient i.e. is there the need for on-site security, CCTV etc.
• Are emergency arrangements in place, adequate and up to date: check site emergency phone number/contact details and ensure that they work.
• Ensure that closed site risk assessment has been completed – from this determine the frequency of inspections and visits to the site.
• Ensure that closed site inspections are being completed at least monthly.
• Review closed site management controls against UKCP15 requirements.
It may also be useful to review the MPA 'Guidelines for the management of public safety on MPA members' operational and non-operational sites' . See the additional pdf.
