TITLE

Transport - Driving safety for its road logistics operations

ARTICLE

Aggregate Industries utilises a very large third party fleet to deliver the wide range of products that the company produces.

This fleet includes over 1,000 franchise and regular haulier vehicles, with around 3,000 hauliers, across 200 sites. In addition to this, Aggregate Industries works with over 1,000 external hauliers, responsible for around a further 5,000 hauliers. In 2021, over 1.2 million deliveries were made.

To keep hauliers, customers, colleagues and the public safe, Aggregate Industries has adopted multiple initiatives across training, technology, vehicle specs and more. Through this, we are driving a safety culture not only within Aggregate Industries, but with the hauliers we work with.

Please click on **additional pdf** at bottom of page to read about the initiatives Aggregate Industries introduced. Please also watch the video on the use of cameras in vehicles by clicking on **run video** button above
