Improvement of existing fencing decision flowchart - Topic 4 - Highly Commended

ARTICLE

TOPIC 4 - Highly Commended

The company historically had a fencing decision procedure to determine the correct type of fencing to be used on boundaries depending on the risk of trespass, vehicles, proximity to roads.

The document was very detailed and confusing to follow, with a choice of 6 types of fencing, but whichever flow was followed, everyone ended up with the same type of fence.

A request was made centrally to have the document refreshed and following meetings between Director of Operations, Cluster Director and the H&S Specialist a new document was developed.

Please see additional pdf for details of the design process
