### TITLE

**Use of electronic detonators to control vibratiron from blasting - MIST funded project**

### ARTICLE

This is a MIRO funded study by Leeds University, supported by additional work by the Camborne School of Mines.

The study has demonstrated that electronic detonators can be used to reduce the environmental impact produced at residential properties or structures from blasting in quarries.

A full copy of the report can be found on the MIST website. Project MA/4/2/003
