Development strategy to change the safety culture of the Thrislington Works

ARTICLE

Description

A continuous improvement strategy was introduced using multidisciplinary teams based around the 4 shifts at Thrislington works. Each team was asked to produce measurable and visible improvements across a range of activities including health and safety. Fundamental to this approach was increasing co-operation and encouraging best practice benchmarking between each team. The process involved

- A management presentation to the teams outlining their purpose
- Allocating the teams responsibility for good housekeeping on specific areas of the site
- Ensuring that the teams had the resources to address H&S issues
- Monthly review meetings of progress and future initiatives
- Re-allocating activities for other teams to action when appropriate
- Photographic evidence of changes and displaying team objectives on notice boards

Benefits

- Significant improvements achieved and recognised by third parties
- Visual improvement to the site.
