Key topics

The workshop is delivered through presentations, demonstrations of industry best practice and information on the most up to date bitumen safety procedures including:

- **New and updated Guide to Safe Delivery of Bitumen**
- **Driver site inductions**
- **Bitumen Discharge Permit**
- **PPE**
- **Tank measurement and gauging**
- **Planned preventative maintenance**

The workshop provides

- Easy to apply practical tools and information to improve site safety
- Improved understanding of the bitumen delivery process
- Improved awareness of risks associated with the bitumen delivery process

The workshop is aimed at asphalt Plant Managers, Operators or anyone with responsibility for bitumen storage and deliveries.

Parking is available on site, refreshments and lunch are included.
